

3.2. Paulaner Hefe-Weißbier from the keg

1. Rinse glass with cold, clear water.
2. Hold the glass at a fairly steep angle under the beer tap. The beer tap is allowed to touch the inside of the glass.

3. Let the beer flow down the inside of the glass.
4. Fill the glass 2/3 full of beer with almost no foam.

5. Now hold the glass upright under the beer tap so that a nice head of foam can form while the beer is flowing into the glass.

6. Server the Paulaner Weißbier immediately!
7. Avoid topping up the glass!
